About Silensec

- ISO27001 certified by the British Standardization Institute (BSI) since 2014
- Re-certification audit in July 2020 to include CYBER RANGES product and services.

bsi.

Certificate of Registration

INFORMATION SECURITY MANAGEMENT SYSTEM - ISO/IEC 27001:2013

This is to certify that:

G & N Silensec LTD G & N Court 41 Pafou Street

The Information Security Management System applies to the provision of the Silensec CYBER RANGES products and services, information security training and consultancy services and 24/7 SOC and managed security services including the support functions of IT, Sales, Finance and Administration in accordance with the Statement of applicability, SIL REC-008_v1.6 Date and operates an Inform 27001:2013 for the foli

The Information Security Management System applies to the provision of the Silensec CYBER RANGES products and services, information security training and consultancy services and 24/7 SOC and managed security services including the support functions of IT, Sales, Finance

For and on behalf of BSI:

Original Registration Date: 2020-07-13

Effective Date: 2020-07-13 Expiry Date: 2023-07-04

...making excellence a habit."

Limassol (CY) - HQ Sheffield (UK) Nairobi (KE)

Services

- Security Audit and Compliance
- Security Systems Integration
- 24x7 SOC
- Managed Security
- Security Training

About us

- Est. in May 2006 in Sheffield
- Privately owned
- 55 people ... and growing

Leadership in Cyber Range Domain

Leading the WG 5 of European Cyber Security Organisation (ECSO), and also specifically on Cyber Ranges SWG 5.1 and Education & Training SWG 5.2

Editor and main author of the **ECSO Paper** on Cyber Ranges (rel. on 30-Mar-2020)

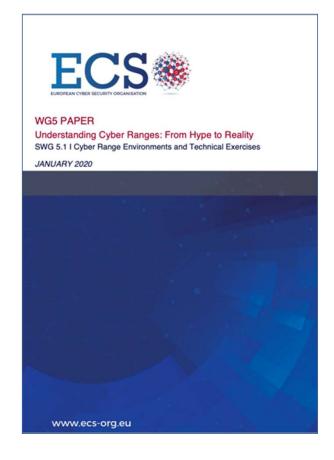

Official platform being used by the UN for the organization of regional and national cyber drills since 2017 – powered up the **ITU 2020 Global Cyber Drill** with 213 participants (58 countries)

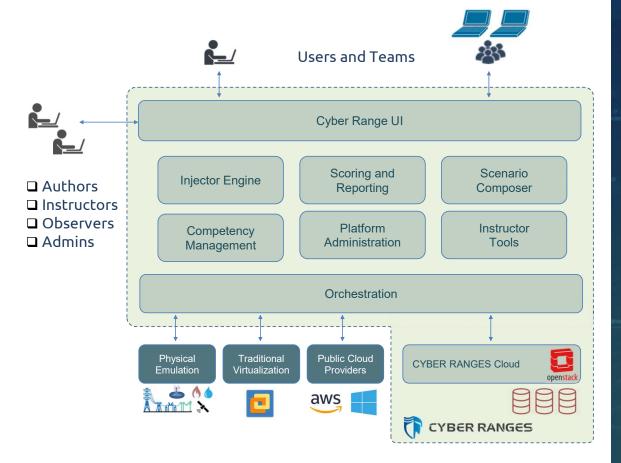

Awarded several EU research grants related

Next-generation Architecture

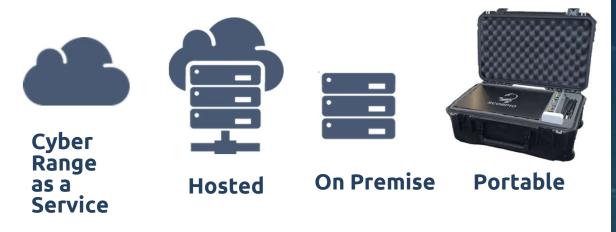

NEXT-GENERATION CYBER RANGE

- Full Stack Technology on baremetal servers
- Fully owned IPR
- Flexible deployment options
- Powerful orchestration
- Scenario composition
- Library of Scenarios, attacks and assessments
- Library of infrastructure assets and integration of 3rd party technologies
- Attack and user traffic simulation
- Multi-user events automation
- Multiple user roles

Deployment Options

CYBER SPACE, ENGAGED.

CYBER RANGES PORTABLE

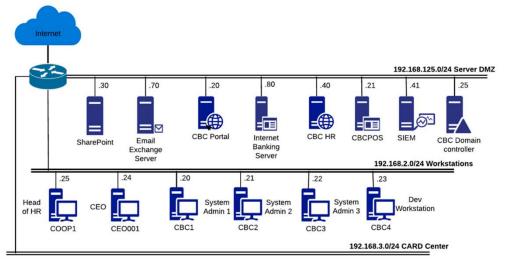

- Pelican case, ruggedized carry-on
- Five-minute deployment
- 3 x Custom Laptops with CYBER RANGES Installed
- 1 x Wireless Access Point with Internet access module
- 1 x Network Switch and cabling
- Injector Engine for user traffic and attacks simulation
- Library of pre-loaded CYBER RANGES Scenarios

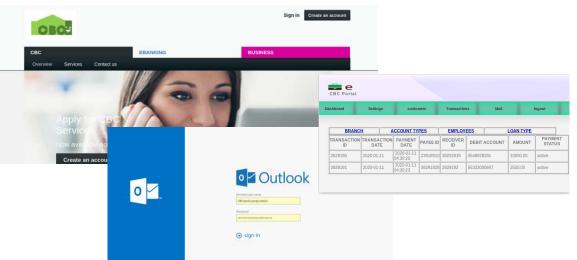

CYBER RANGES
Functionalities at Glance

Library of Scenarios

- Learning Paths
 - □ SOC Analyst
 - □ System administration
 - □ Penetration testing
 - □ Malware analysis
 - □ ... and many more
- Corporate Scenarios
 - □ Red Team
 - □ Red vs Blue Team
 - □ Incident Response
- MITRE ATT&CK Scenarios
 - Multiple attack techniques
 - □ Multiple CVEs

Scenario Composition

Build multi-segment Networks From Scratch

Reusable Library of VMs and Simulation Environments

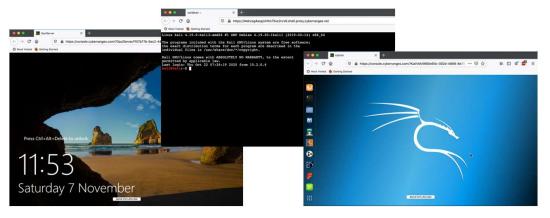

Full ACL Support for Authors Collaboration

- Library of Content
 - □ Virtual Machines
 - □ Simulation Environments
 - □ Assessments
- Scenario Repurposing
 - □ Cloning of Scenarios
 - Cloning of simulation environments
- Full ACL Support
 - □ Scenarios
 - Simulation Infrastructures

Usability

In-Browser Access to the Simulation Environment

Access via VPN for for BYOD Engagements

Individual access to the VMs

- Per-VM Access Modes
 - □ VPN
 - □ Web Shell
 - □ Remote Console
 - □ Web Proxy
- Individual Access to VMs
 - □ Restart
 - □ Reset

User Traffic & Attack Simulation

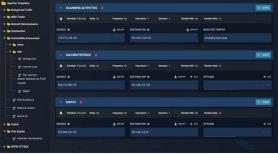

Configurable Attack Library

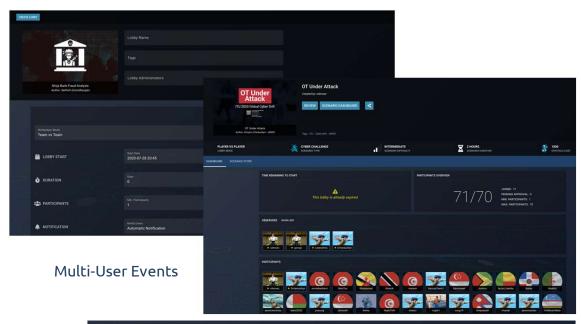

Per-Scenario Attack Flows

- Agent-based attack and user traffic simulation engine
- Background Traffic Simulation
- Stateful attack injection
- Simulation of false-positive attacks
- Red Team Automation
- Configurable Attack Library
- Live injections during scenarios
- Configurable IP Address Pools
- Automatic orchestration of attacks

Orchestration

Events Calendar

- One Click to Create Multi-User Events
 - □ Multiple isolated networks or Shared networks
 - □ Automatic orchestration of attack simulation
- Numerous Applications
 - □ Red vs. Blue teams exercises
 - □ Security Training
 - Competence Assessment
 - □ Staff Recruitment
- Events Calendars
- Invite Users to Join Events

Reporting

Organizational View

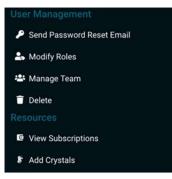

Tracking User/s Progression

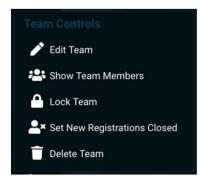

- Manage Organizations
 - Manage teams and staff
 - □ Assign users to scenarios
- Track User/s Progression
 - Engagement
 - □ Competency areas
- xAPI Compliance
 - ☐ Integrate with third-party LMS

Administration and MSSP

Users and Teams Management

- CYBER RANGES
 Administration
 - Manage Scenarios and Events
 - Manage Users and Teams
 - Manage Permissions
 - Manage Competency Frameworks
- MSSP Functionalities
 - □ Manage Subscription Plans
 - ☐ Issue Promo Codes
 - Create and Manage Organizations

Why CYBER RANGES by Silensec

- Leading the Cyber Range Technology Innovation
- Delivered also on-premise, built to scale
- Start using CYBER RANGES for security training and continue using it for:
 - competence-based recruitment
 - development of cyber capabilities
 - profiling skills at national level
 - improving cyber resilience
 - proof of concept, product testing

... and much more

CYBER SPACE, ENGAGED.
